

NEW PRODUCT

Mass-Labelled anti-Dechlorane Plus **Ma-DP**

Dechlorane Plus® (DP) is a current use additive polychlorinated flame retardant with a variety of applications including electronic cables and wiring, and plastic building materials. Due to rising concerns regarding the presence of DP, and its related compounds, in environmental samples, **Wellington** has expanded our DP product line to include a mass-labelled anti-DP certified reference standard which we hope will aid in the analysis of this group of compounds.
